Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02/26/2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The references listed on the information disclosure statement filed on 11/10/2005 and 01/05/2006 have been considered by the examiner (see attached PTO – 1449).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1 – 5 are rejected under 35 U.S.C. 102(e) as being anticipated by McVeigh et al (US 2003/0185542 A1).

As to claim 1, McVeigh discloses a video data recording apparatus (108) comprising:

a first encoder section (104) encoding input video data at a first compression rate (MPEG-4) (see [012] and [015]) and ;

a second encoder section (106) encoding the input video data at a second compression rate (MPEG-2) (see [012] and [015]); and

a storage section (116) storing the video data encoded by the first encoder section and the video data encoded by the second encoder section while associating the encoded video data with each other (see [014], [015] and [024]).

As to claim 5, McVeigh discloses a method of recording video data, comprising:
encoding input video data at a first compression rate (MPEG-2) (see [012] and [015]) ;

encoding the input video data at a second compression rate (MPEG-4) (see [012] and [015]);

recording the video data encoded at the first compression rate and the second compression rate while associating the encoded video data with each other (see [014], [015] and [024]); and

transferring the video data encoded at the second compression rate to a mobile device when transfer to the mobile device is instructed (see [015], [018], [025].

As to claim 2, McVeigh discloses the recording apparatus according to claim 1, further comprising:

a management section managing the video data stored in the storage section as video files (see [019], [020] and [031] – [033]); and

a transfer section transferring the video data compressed at the second compression rate to a mobile device when transfer of the video files to the mobile device is instructed (see [018] and [024]).

As to claim 3, McVeigh discloses the recording apparatus according to claim 1, further comprising:

a management section managing the video data stored in the storage section as video files (see [019], [020] and [031] – [033]) ; and

a transfer section transferring the video data compressed at the second compression rate to a memory card when transfer of the video files to the memory card is instructed (see [018 and [024]. A memory card uses flash memory).

As to claim 4, McVeigh discloses the recording apparatus according to claim 1, further comprising:

a management section managing the video data stored in the storage section as video files (see [019], [020] and [031] – [033]);

a first display section (342) displaying the video files of the video data of identical contents stored in the storage section, as a single file (see [031] – [033]);

a second display section (344) displaying the video files of the video data of identical contents stored in the storage section, as different files (see [031] – [033]); and

a section instructing any one of the first and second display sections to execute the displaying (see [017]).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 2003/0133032 discloses encoders and storage mediums.
